

CHEMONICS INTERNSHIPS: SUMMER PROGRAM

Chemonics' Internship Program offers a diverse group of motivated students the opportunity to gain first-hand experience in international development.

Based in Washington, D.C. and Arlington, Virginia, Chemonics interns are involved in carrying out technical, new business, and project management tasks while building networks and professional skills. The multi-faceted program encourages students to bring their unique talents to contribute to the work at Chemonics and to the field of global development.

The Internship Experience

Learning. Interns participate in learning events, engaging in discussions with Chemonics' senior staff and experts. Interns are also paired with mentors and recruiters to gain insights on their own career development.

Training. Interns attend custom trainings, equipping them with knowledge and skills to be leaders in the field of international development.

Development. Interns work on tasks that matter, contributing to the daily work of Chemonics' teams and developing skills to prepare them for their careers.

Exposure. Interns see it all, gaining exposure and hands-on experience in USAID contracting and compliance, and Chemonics' systems, processes, and technical capacities.

INTERNSHIP FAST FACTS

- Applications open in January, and final selections are made in March
- The internship is 10-weeks long
- All positions are full-time and paid
- Internships are offered in our business units, support divisions, and technical practices

"Interning with Chemonics gave me the opportunity build lasting relationships with a supremely talented, driven, passionate, and generous network of professionals."
- Grace Chao, Global Operations and Improvement Intern, 2017
